

Launch a Technology Venture with the Power of NASA and FedTech!

NASA Colorado Startup Studio Bridges the Gap Between Lab-Created Technology and Entrepreneurs

How it Works

1

Get Matched with NASA Technology

Groups of three entrepreneurs will be assigned a technology based on their interest, background, likeliness of success, and more factors in the application process.

2

Conduct Research and Create a Go-to-Market Plan

Through workshops, customer discovery interviews, and mentoring, entrepreneurs will determine an industry to pursue with their assigned technology.

3

Polish the venture pitch with the help of seasoned experts

Entrepreneur teams will work with experts from different fields to improve their business skills, technology understanding, legal understanding, and more.

4

License Assigned Technology and Launch!

Successful entrepreneurs have the chance to launch a venture after securing a license from their technology's lab before launching their venture company.

Who Can Apply?

To create successful teams of entrepreneurs, we are looking for people with diverse backgrounds and the following skillsets:

- Technologists
- Spokespeople
- Businesspeople
- Creative Thinkers
- Operators
- First-time entrepreneurs are encouraged to apply!

Perks of the Program

- Gain access to NASA Lab-created technology
- Mentorship from experts in the business, technology, marketing, innovation, and legal realms
- Access to resources from NASA and FedTech ecosystems
- The chance to launch a spinoff company!

Apply Today!

Applications are open from January-April 2024.
